

Trip Planning and Data Analysis Report

Generated At: 2025-05-20

Query: I am planning a trip to Delhi. 1. Find the current weather in Delhi. 2. Search for the latest 3 major AI news headlines from this week. 3. Summarize those news headlines in less than 150 words. 4. Calculate how many days are left between today and 2027-01-01. 5. Convert: 100 km to miles, 25°C to Fahrenheit. 6. Use Python to generate the first 15 Fibonacci numbers and calculate their average. 7. Solve the equation $x^2 + 5x + 6 = 0$. 8. Integrate $x^2 + 3x + 2$.

Tools Used

get_weather

Input: {'location': 'Delhi'}

Output: In Delhi, the current weather is as follows: Detailed status: clear sky Wind speed: 1.66 m/s, direction: 67° Humidity: 30% Temperature: - Current: 37.38°C - High: 37.38°C - Low: 37.38°C - Feels like: 38.38°C Rain: {} Heat index: None Cloud cover: 1%

search_tool

Input: {'query': 'latest 3 major AI news headlines this week'}

Output: {'query': 'latest 3 major AI news headlines this week', 'follow_up_questions': None, 'answer': None, 'images': [], 'results': [{'url': 'https://www.instagram.com/p/DZUf0vhgAQP', 'title': 'Another major week in AI! Here's what's ...', 'content': '- Chinese startup brings Claude Code and Codex to smart glasses - China's police drones now patrol traffic from the sky - Anthropic just filed to go public -', 'score': 0.7140107, 'raw_content': None}, {'url': 'https://www.wcax.com/2026/06/11/ai-generated-video-vermont-congressional-race-tests-new-state-disclosure-law', 'title': 'AI-generated video of Vermont congressional race tests new ...', 'content': 'The AI-generated depictions of Rep. Becca Balint show fabricated statements attributed to the candidate.', 'score': 0.26293454, 'raw_content': None}, {'url': 'https://www.wsj.com/video/kai-fu-lee-the-ai-device-of-the-future-will-always-be-listeningand-eventually-invisible/26B1923A-360B-440F-B098-4FB0DA51733D', 'title': 'Kai-Fu Lee: The AI Device of the Future Will Always Be ...', 'content': 'At the 2026 WSJ CEO Council Summit in London, AI entrepreneur and investor Kai-Fu Lee, CEO of 01.AI and Chairman of Sinovation Ventures,', 'score': 0.26049337, 'raw_content': None}], 'response_time': 1.2, 'request_id': 'ebb1fab3-be55-409b-8b60-d53a04132832'}

date_difference

Input: {'end_date': '2027-01-01', 'start_date': '2025-05-20'}

Output: Days between 2025-05-20 and 2027-01-01: 591 days (signed difference: 591)

unit_converter

Input: {'from_unit': 'km', 'to_unit': 'mile', 'value': 100}

Output: 100.0 km = 62.137119 mile

convert_temperature

Input: {'from_unit': 'C', 'to_unit': 'F', 'value': 25}

Output: 77.0 °F

python_repl_tool

Input: {'code': 'def fibonacci(n):\n fib_sequence = [0, 1]\n while len(fib_sequence) < n:\n fib_sequence.append(fib_sequence[-1] + fib_sequence[-2])\n return fib_sequence[:n]\n\nfibs = fibonacci(15)\navg = sum(fibs) / len(fibs)\nprint(f"Fibonacci: {fibs}")\nprint(f"Average: {avg}")'}

Output: Fibonacci: [0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144, 233, 377] Average: 65.73333333333333

scientific_calculator

Input: {'query': 'solve(x**2 + 5*x + 6)'}

Output: [-3,-2]

scientific_calculator

Input: {'query': 'integrate(x**2 + 3*x + 2)'}

Output: $x^3/3 + 3x^2/2 + 2x$

■ Final Answer

As you prepare for your trip to Delhi, here is the requested information: 1. Delhi Weather: Currently clear skies with a temperature of 37.38°C (feels like 38.38°C). 2. AI News Summary: Headlines include a Chinese startup bringing AI to smart glasses, police using AI-driven drones for traffic control, Anthropic filing to go public, concerns over AI-generated deceptive political videos, and discussions on future invisible AI devices. 3. Countdown: There are 591 days until 2027-01-01. 4. Conversions: 100 km is 62.14 miles; 25°C is 77°F. 5. Fibonacci Sequence (first 15): [0, 1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89, 144, 233, 377] with an average of 65.73. 6. Math Solutions: The equation $x^2 + 5x + 6 = 0$ yields $x = -3$ and $x = -2$. The integral of $x^2 + 3x + 2$ is $x^3/3 + 3x^2/2 + 2x$.

■ Summary

Retrieved current weather for Delhi, summarized recent AI news, performed date calculations, unit conversions, executed Python code for Fibonacci calculations, and solved algebraic and calculus problems.
